Grand Vision *Perspective*

COMPANY PROFILE

Operations consulting for businesses that have *outgrown how they run*.

Grand Vision Perspective is a management and operations consultancy. We diagnose how a business runs today, redesign the processes that have drifted, and oversee implementation through to handover.

PRACTICE Management and operations consulting	FOUNDED 2023	BASE Bali, registered in Indonesia
CLIENTS Europe, the US and Asia	EXPERIENCE 20+ years across three continents	DELIVERY Every engagement taken through to handover

01

Who we work with

Founder-led businesses that have outgrown the tools and habits they started with. Our client work spans hospitality, food and beverage, and services businesses.

- Founder-led companies where the founder still touches operations.
- Operations-heavy businesses where at least one process has drifted and now costs real time.
- Multi-entity groups whose finance lead has stopped trusting the numbers.
- Teams that want a way of working they own, not a tool they rent.

02

What we do

We work on how the business runs, not only the tools it runs on. Automation is one method among several, used where it removes repetitive work.

Management and Operations Consulting

Operational audits, process mapping, and a clear redesign of how work moves through the business: sales pipeline, approvals, back office and management reporting.

Strategic Advisory

Roadmaps, priorities and hands-on guidance for founders and operators. We find where friction is costing time and money, and show how to remove it.

Implementation Oversight

A phased implementation plan, coordination with your team and chosen vendors, and automation only where it genuinely removes repetitive steps. Training and documentation included.

03

How an engagement works

STEP ONE

Strategy call

30 minutes, free

We listen, ask the right questions and say plainly whether we can help.

STEP TWO

Operations Audit

Fixed fee, a few days to two weeks

A written report, a recommended scope and a fixed price for implementation. You keep the report.

STEP THREE

Implementation and handover

Fixed price, scoped from the audit

We coordinate the change with your team and vendors, train your people and hand over documentation.

AFTERWARDS

Optional care

Monthly, after handover

A defined scope of cover. 3-month minimum term, then pause or end at the end of any monthly cycle.

04

Results from client work

Clear

finance admin for a multi-entity hospitality group, through process redesign.

THE PROBLEM

Several entities, and a lot of manual finance admin between them: transactions, reconciliation handoffs and management reports.

WHAT WE CHANGED

We redesigned how transactions, reconciliation handoffs and management reports flowed across the entities, then oversaw the implementation.

THE RESULT

Manual handoffs between entities fell away. Bookkeeping and tax stayed with the group's accountant.

Time

Back for a growing services business, through process redesign across sales, finance admin and operations.

Steady

Workflows audited on a client's live automation platform and brought under proper change control and error monitoring, without interrupting day-to-day work.

Files

Organised across the team's cloud drives, with a new structure and simple rules that keep it clean.

"Three companies, three sets of books, three different stories every Monday. Now I open one dashboard and I know exactly where each entity stands. The first time my finance team handed me a consolidated P and L without two weeks of compilation, I actually paused. I hadn't seen the business that clearly in years."

Bayu, Co-founder, hospitality and F&B group, Jakarta

All projects are anonymised. Grand Vision Perspective advises on operations and process design; bookkeeping and tax are handled by each client's own accountant.

05

How we engage

The commitments behind every engagement.

Confidential by default
A mutual NDA, signed before any audit starts.

Anonymised work
We never name clients or show their logos.

Fixed scope, fixed price
The number is in writing before you sign. No timesheets.

You keep the report
Whether or not you continue with us.

Advice, not accounting
Bookkeeping and tax stay with your own accountant.

Method before tools
We map the work first. Software comes after, if at all.

06

From the founder

Our founder started Grand Vision Perspective after twenty years across franchises, startups, corporates, hospitality, construction and growing companies on three continents. In every environment the same pattern kept showing up: broken systems putting unnecessary pressure on good people. The practice exists to fix that, combining international strategic experience with local operational knowledge from its base in Bali.

Founder and Principal Consultant

Talk to us about how your business runs.

Start with a free 30-minute strategy call. If there is a fit, the next step is an Operations Audit with a fixed scope and fee.
